The Canadians are preparing in earnest to have

a Railroad connecting Toronto with Kingston, and the at. ter place with the Watertown and Rome Road. A Con-vention was held at Kingston on the Sd February, com. posed of delegates from among the most intelligent gentlemen of the province, and resolutions were passed which exhibit a determination to do what is said. They have the exhibit a determination to do what is said. They have the pledge of the Home Government for one half of the expense; the balance, one fourth by Municipalities or County Councils, and one fourth by individual subscriptions. The Watertown and Rome Railroad, commenced and rapidly progressing to completion, bids fair to be one of the best paying stocks in the State. It is now in easy circumstant will be completed the complete summer. In adstances and will be completed the coming summer. In addition to the Canadian movement we learn that Oswego is taking steps to connect with this road at Williamstown Mills, or near there. This will prove no inconsiderable affluent, and is just so much clear gain, for without this connection travel and freight would go by Syracuse as

RARE J. E. Boxeria, Honolulu Harbor, Nov. 18, 1850.

Foces are fragas on the Coast of Jans.—It may not be generally known that our charts are not antigether correct in regard to the Japanese Islands; sapecially that part which delicates the small slaude of fine mouth of the Bay of Jaddo and the Coast of Nishou, immediately to eastward of the Cape Sonkai as far as Cape King. Broughton's Bocks are half down on the charts in the istricties = 33 Ja, while at noon, May 6, 1800, in the latitude of 34 O4, they were definicity visible from our vessels' dect. The highest of these roots in number) is not higher than the hull of a commic asset sip, and could not be discensed from a shop seek more thank trailing and could not be discensed from a shop is seek more thank trailing and of the north than the charts place them. The same may be said of Vulcan's and Prince's Islands. Cape King is not only cut of the way in latitude was all 56, and longitude by two good chrostometers, confirmed by three sets of intar observations was 140 44. The would place us directly is eastward of Cape Awa thirty miles. By our course we passed within ten miles of the place assigned to that Cape, yet no lands could be seen less than forty miles detail. The conclusion therefore is that all these inlands are but down too far to eastward by 250 x 10 miles, and to suptheral at least 20 miles. Our chromometers a few days subsequent to this, were proven by comparison with Cape Viete, east end of Rouroup or taken laking, when we input them correct.

I cannot close this without speaking more fully of Broughton's Rocks. The Chalter stends and x 2.5 E and W a W line. There are six of them, and are not over one mile and a half from one astremity t. the other We first saw them at 4 o'lobok is the
